## EXPERTISE

### Field

Computer Science

### Expertise

Computer Networking

### Specialization

Soft Computing  
Numerical Method  
Mobile Development

## RESEARCH CONTRIBUTION & ACHIEVEMENT

My research interest is focused on the optimization in electric energy by using numerical method and soft computing. My recent research work focuses on the energy security towards electricity energy. Recent research emphasize on simple electric circuit and the impact on how soft computing and numerical method can contribute to energy security. This includes research interests in the designing and developing tools to calculate the optimization of electric energy in mobile application

### NETWORKING & RESEARCH COLLABORATION
