EXPERTISE

Field

Manufacturing Engineering

Expertise

Manufacturing Process &
Quality System

Specialization

Coating cutting tools
Machining Process
DOE

RESEARCH CONTRIBUTION & ACHIEVEMENT

My research interest is focused on the areas of coating cutting tools, Nano coated process and machining operations. My recent research work focuses on the comparison various coated tools that available in market. This includes research interests in the design of experiment (DOE), coated tools selection, machining with selected parameters and analysis using Taguchi methods.
