EXPERTISE

Field

Computer Science

Expertise

Network and Information
Security

Specialization

Intrusion Detection System
Rough Set
Big Data Classification

RESEARCH CONTRIBUTION & ACHIEVEMENT

My research interest is focused on the areas of network and information security, such Intrusion Detection System, Rough Set and Big Data Classification. My recent research work focuses on the new model of Intrusion Detection System using enhancement of Rough Set Theory, significant Discretization algorithm for network traffic and also new algorithm of Query Encryption in cloud system. I have also been appointed as a reviewer/editor for the International Journal of Integrated Engineering IJIE Vol. 10 (2018) and International Conference on Advanced Technologies Enhancing Education ICAT2E 2017
